SUBJECT INDEX

Acquired immunodeficiency syndrome: *see* AIDS
AIDS
  enteral fiber formulation in patient with, 136
  malnutrition in patients with, 16
Albumin
  serum levels, assay specificity, 203
  supplementation, during parenteral nutrition (abstract), 115
American Society for Clinical Nutrition, total parenteral nutrition guidelines, infants and children (abstract), 71
Amino acid
  branched chain
    effect on postoperative muscle protein synthesis and nitrogen balance (abstract), 184
    preventive effect, cirrhotic patients (abstract), 40
    severe surgical patients with sepsis (abstract), 219
  formula comparison, severe brain injury (abstract), 38
APACHE II, failure as mortality predictor, total parenteral nutrition patients (abstract), 185
A.S.P.E.N.
  committee reports, 78, 159
  executive director's report, 123
  PENline, 44, 76, 119, 158, 221
  standards of practice
    hospitalized pediatric patients, 33
    long-term care facilities, 148

Brain injury, amino acid administration, comparison, standard formulas (abstract), 38

Calorimetry
  indirect
    data interpretation by dietitians (abstract), 154
    oxygen consumption measurement, critically ill patients (abstract), 220
Cancer, chemotherapy-associated nausea and vomiting, pediatric patients (abstract), 71
Catheter, central venous, dressing, infection rates (abstract), 186
Chronic obstructive disease, nutrition support in patients with, 173
Cirrhosis, postoperative hepatic encephalopathy, preventive effect, branched chain amino acids (abstract), 40
Crohn's disease, severe, living on nutritional support, clinical observations, 57
Current Literature, 38, 71, 115, 154, 184, 218

Deep venous thrombosis, upper extremity, changing concepts (abstract), 38
Diabetes mellitus, nutritional support in patients with, 179
Diarrhea
  intractable, nutrition support, pediatric patients, 19
  secretory, octreotide therapy (abstract), 39
Dietitian, indirect calorimetry interpretations, suggested guidelines (abstract), 154
Drug therapy, considerations, enteral nutrition patients, 105

Editorial
  Home nutritional support: the patient point of view, 49
  In search of the 'preferred fuel', 3
  Nutrition and respiration, 165
  Nutrition support and the wave of the future, 93
  Nutrition support of the critically ill obese patient, 125
  Medical care in a changing health care environment, 191
Energy
  expenditure, evaluation, obese patients, 127
  metabolism, regulation, septic patients, 6
Enteral nutrition
  drug therapy considerations, 105
  feeding tube obstruction, new approach, 111
  fiber-containing formula, AIDS patient, 136
  home therapy
    current practices (abstract), 154
    psychological concerns, 51
  hypermetabolic surgical patients (abstract), 218
  long-term, after head trauma, pregnant patient, 101
  modular, preparation method (abstract), 72
  oral phenytoin absorption and, 176
  peptide-based formulas
    clinical applications, 211
    intestinal absorption, hypoproteinemic rat (abstract), 218

Fatty acid, essential deficiency, topical oil applications, 140
Feeding tube, enteral, obstruction management, 111

Gas exchange, metabolic, intermittent recordings, diurnal values (abstract), 40
Golden skin test, zinc status assessment, 206

Head injury, long-term enteral nutrition support after, pregnant patient, 101
Hypersensitivity, topical zinc, 206
Hypoproteinemia, peptide enteral formulas in, intestinal absorption, rat (abstract), 218

Infection, central venous catheter dressings (abstract), 186
Intensive care unit, pulmonary, muscle and and serum magnesium (abstract), 39

Lipid emulsion, medium-chain triglyceride-enriched, intravenous infusion (abstract), 115
Liquid feeding, restricted, effect on gastrointestinal and adrenocortical variables, rat (abstract), 219

Magnesium, muscle and serum levels, pulmonary intensive care patients (abstract), 39
Malnutrition
  adjunctive therapy, hospitalized patients, 95
  early identification, protocol for nutritional risk screening (abstract), 73
  incidence, AIDS patients, 16
Medical cost, reimbursement for nutrition support, 194
Medical training, total parenteral nutrition order form used in, 145
Muscle
  nitrogen balance, postoperative, branced chain amino acids effect (abstract), 184
  protein synthesis, postoperative, branched chain amino acids effect (abstract), 184

New Products, 42, 74, 117, 155, 187
Nutrition, physiological basis, during sepsis, 6
Nutritional status, risk screening, standardized protocol (abstract), 73
Nutritional support
  adjunctive therapy, hospitalized patients, 95
  adjuvant therapy, hospitalized patients, 95
  A.S.P.E.N. standards
    hospitalized pediatric patients, 33
    long-term facilities, 148
  elective, after major surgery (abstract), 184
  intractable diarrhea, pediatric patients, 19
  management, diabetic patient, 179

reimbursement for, 194
respiratory disorders, 173
respiratory failure, 166
stressed obese patient, 130
Nutrition therapy, short-term response, evaluation (abstract), 185

Obesity
energy expenditure evaluation, 127
moderate hypocaloric parenteral nutrition, critically ill patient, 133
stressed, nutrition support, 130
Octreotide, secretory diarrhea treatment (abstract), 39
Oxygen, consumption, measurement method comparison, critically ill patients (abstract), 220

Parenteral nutrition
albumin supplementation during, effect on hospital morbidity (abstract), 115
central, focused review criteria for, 24
home therapy
psychosocial concerns, 51
self-management, consumer preparation, 67
moderate hypocaloric, critically ill, obese patient, 133
total
all-in-one-system, Switzerland, 31
home therapy in sparsely populated areas, 62
mortality prediction (abstract), 185
nutrition guidelines, infants and children, American Society for Clinical Nutrition (abstract), 71
order form as education basis, 145
severe Crohn's disease, clinical observation, 57
Pediatrics
chemotherapy-associated nausea and vomiting (abstract), 71
hospitalized patients, nutrition support, A.S.P.E.N. standards, 33
intractable diarrhea, nutrition support, 19
preterm infants, reliability of weighing procedures (abstract), 220
total parenteral nutrition guidelines, American Society for Clinical Nutrition, 71
Peptide
in enteral formulas
clinical applications, 211
intestinal absorption, hypoproteinemic rat (abstract), 218
Phenytoin, oral absorption, effect of enteral feedings on, 176
Prealbumin, indicator of response to nutrition therapy (abstract), 185
Pregnancy, long-term enteral nutrition support, after head trauma, 101

Respiratory distress syndrome, adult, nutrition support in patients with, 173
Respiratory failure, nutritional support, 166
Retinol-binding protein, indicator of response to nutrition therapy (abstract), 185
Reverse Fick principle, oxygen consumption measurement, critically ill patients (abstract), 220

Sepsis
branched-chain amino acids and, surgical patients (abstract), 219
metabolic events during, 6
Surgery
hypermetabolic patients, enteral nutrition in (abstract), 218
major, elective nutritional support after (abstract), 184

Topical oil, applications, essential fatty acid deficiency, 140
Triglyceride, medium chain, intravenous infusion (abstract), 115

Upper extremity, deep venous thrombosis, changing concepts (abstract), 38

Vomiting, chemotherapy-associated, pediatric oncology patients (abstract), 71

Washington Review, 1, 47, 91

Zinc, topical administration, delayed hypersensitivity, 206
